

Carbon Footprint Report

Step 1

Material: Magnesium

Quantity: 1000 kg

Process: Blast Furnace Steelmaking

Electricity origin: Austria

Distance: 100 km

Transport: Transoceanic Cargo Ship

Material emissions: 19000 g CO2

Process emissions: 2000 g CO2

Transport emissions: 1500 g CO2

Electricity emissions: 5500 g CO2

Step total: 28000 g CO2

Step 2

Material: Primary Aluminum

Quantity: 100 kg

Process: Electric Arc Furnace Steelmaking

Electricity origin: Canada

Distance: 10 km

Transport: Transoceanic Cargo Ship

Material emissions: 1400 g CO2

Process emissions: 100 g CO2

Transport emissions: 15 g CO2

Electricity emissions: 6500 g CO2

Step total: 8015 g CO2

Grand total: 36015 g CO2
